

Morgan & West Part 1

Monday 1st March 2021

Morgan & West Part 2

Monday 17th May 2021

Part 1 Lecture

This lecture is all about three effects from our show Parlour Tricks in quite some depth and covers everything from methods to thinking behind why the tricks are done the way they are. Two of the tricks are excellent for solo performers, one of the tricks is used to illustrate how you can take a 'classic' and find your own trick in it.

Part 2 Lecture

The lecture is all about the secretive world of coding but broken down into its most basic element. It teaches really simple and straight-forward codes for everyone to learn and get playing with right away. Very few people talk openly about coding in mentalism and magic, so we want to show others just how much fun it can be to play with. We also talk in full about our most complicated code tricks. It's something very different and has always been well received by magicians from Blackpool to Magic Live in Vegas.

Both lectures are fully supported by video performances and slide shows so it's not just two heads on a screen talking at you, we wanted to make it as interesting, as fun, and most importantly as engaging as possible. We're then happy to do as much Q&A and chat about anything as wanted as well.

IMPORTANT INFORMATION

For the lecture itself we don't **actually use Zoom** (despite the title!). It's done in the same way as a stream, so you get a **YouTube link** and members can interact in the comments which we go to for questions etc. The link remains active for a month so anyone who didn't make it on the night can watch it, and if there's stuff you want to refer back to you can easily.

Morgan & West have now done it for 8 clubs in the UK and US in the past two months and it's always gone down well.

The newsletter with the link will be sent out at a later you can click on the link from 7pm and the lecture will start at 7.15pm
