

**The Leicester Magic Circle presents: -
Michael Ammar Masterclass & Lecture**
Thursday 15th May 2025
Braunstone Civic Centre - Council Chambers

MasterClass Description: (Starts at 4pm) 2 hour lecture

The MasterClass is a completely different experience from the lecture. While the lecture is more of a performance with commentary, the MasterClass is hands-on, interactive, and focused on real learning in real time. I always come prepared to teach some strong classic material, but I tailor each session to what *you* want to learn. I begin by asking what people hope to cover, and we start there. That often fills the session, but I always prioritize the topics that matter most to the group. If you have specific questions or areas of interest, feel free to send them in advance so I can be fully prepared. Otherwise, just bring a deck of cards, a few coins, and anything you'd like to explore!

Lecture Description: (Starts at 7.30pm)

The lecture features a mix of my signature effects, time-tested classics from over 40 years of performing, and a few surprises you've probably never seen before. Every routine I share comes straight from my working repertoire—these are solid, real-world pieces of magic. But more than just tricks, I've selected material that highlights the way I think about magic: the theory, structure, and subtleties that elevate performance. Many magicians have told me that it's these deeper insights—the thinking behind the magic—that they enjoy most and take the most from.
